DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claim 1 recites a transparent conductive laminate comprising a transparent polymer substrate, an **uneven cured resin layer-1** formed on at least one side of the substrate and a transparent conductive layer formed on the cured resin layer-1 directly or through another layer,**wherein the haze value defined by JIS K7136 based on the transparent polymer substrate and the cured resin layer-1 is 1% or more and less than 8 %.**

It is unclear, from both the Specification and the claims, what is meant by "uneven". Is the cured resin layer rough? Furthermore, is the haze value for the entire conductive laminate or just the substrate and the cured resin layer?

Claim 5 recites that there is "a thickness of 0.05 to 0.5 microns between the cured resin layer-1 and the transparent conductive layer". Again, it is unclear, from both the Specification and the claims, what is meant by a thickness **between** the resin layer and the conductive layer.

Claim 7 recites that the “transparent conductive layer is a crystalline layer comprising indium oxide as the main component”. What is meant by ***main component*** in this instance?

Appropriate correction or clarification is required.
